DETAILED ACTION

Applicants election of Group I, claims 1-8 and the compound wherein R3 or R4 is the distinct location for the (C0-C30)alkylene-(LAG) radical and the (C0-C30)alkylene as the linker found in Example 1 with traverse is acknowledged. The Examiner has decided to include Groups II-V with Group I.

Claim Objections

Claim 8 is objected to because of the following informalities: Claim 8 recites several active compounds as ingredients in the said composition but is not in proper Markush form.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the terms "active compounds". It is not clear what type of activity is meant.

The term "normalize" in claim 7 is a relative term that renders the claim indefinite. The term "normalize" is not defined by the claim, the specification does not provide a standard for

ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Conclusion

1. Claims 1-5 and 8 drawn to compounds of structural formula I with the specified substitutions, pharmaceutical compositions comprising the same with various additional active ingredients are found to be free of prior art.

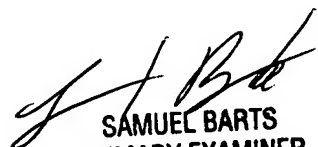

2. Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
